... mount an SMB share in macOS

Step 1 - Connect to server

Open the *Finder* on your Mac and choose *Go* > *Connect to Server...* in the menu bar:

In the dialog window *Connect to Server*, enter the network address of your SMB share (e.g., "smb://idnas03.d.uzh.ch/G_LINGUISTIK_Data\$") and click on *Connect*:

smb://idnas03.d	l.uzh.ch/G_LINGUISTI	<_Data\$	~
Favorite Servers:			
+ - 0 -	?	Browse	Connect
+ - 0 •	f	blowse	Connect

If prompted, click on *Connect* to confirm the attempt to connect to the server.

Enter your user name (UZH shortname) and password (Active Directory password) and click on *Connect*:

Connect As:	Guest
	Registered User
Name:	lirilangtech
Password:	•••••
Demen	her this password in my keychain

After the connection is successfully established, the SMB share appears as a network drive in the *Finder*:

Favorites	BOOTCAMP	>	🚞 LiRI	>
